# Parmeet Singh

+91-9305129457 | parmeetsingh.indulhi@gmail.com | LinkedIn | GitHub

## Summary

Software Engineer experienced in developing scalable web applications and enterprise solutions using the MERN stack. Proficient in React, Node.js, Express.js, Java, Python, SQL, and MongoDB, with experience building RESTful APIs, secure authentication and role-based systems, responsive interfaces, and vulnerability management solutions. Strong foundation in data structures and problem-solving, with 700+ coding problems solved, and a focus on writing efficient, maintainable software.

## Education

**GL Bajaj Institute of Technology and Management** — Greater Noida, India
*Bachelor of Technology, CSAIML* — *Nov. 2021 – Aug. 2025*

**Manas Sthali Public School** — Bareilly, India
*10+2* — *May 2018 – March 2020*

## Technical Skills

**Languages:** Java, Python, SQL
**Frameworks & Technologies:** Node.js, Express.js, HTML, CSS, Tailwind, React
**Databases:** MongoDB, MySQL

## Experience

**Accenture** — Gurugram, India
*Associate Software Engineer* — *Oct. 2025 – Present*

- Built frontend modules for a MERN-based Vulnerability Management Tool using React, Redux, and REST APIs, enabling real-time processing of PLC/sensor log data for vulnerability analysis while reducing manual operational effort by 60%.
- Developed and optimized detection rules across Claroty, Nozomi, and Microsoft Defender for IoT, reducing false positives by 20%.

**Accenture** — Gurugram, India
*Trainee* — *Feb. 2025 – Jun. 2025*

- Assisted in alert analysis and incident handling to reduce false positives.
- Built Power BI dashboards for vulnerability tracking and reporting.

## Projects

**Study Notion – EdTech Platform** — Live Project

- Built a full-stack MERN application with secure JWT authentication and role-based access control (Admin, Instructor, Student).
- Designed a modular course management system with optimized REST APIs for content delivery and user progress tracking.
- Developed a responsive React UI with reusable components and efficient state management.

**DevTinder – Developer Networking Web Application** — GitHub

- Built a developer networking platform enabling users to create profiles, discover developers, and manage connection requests.
- Developed secure RESTful APIs using Node.js and Express.js with JWT authentication and bcrypt password hashing.
- Designed MongoDB data models using Mongoose for efficient management of users, profiles, and connection workflows.

## Achievements

- Solved 450+ DSA (LeetCode) and 700+ total coding problems, demonstrating strong consistency and algorithmic skills.
- Accenture Innovator Award for enterprise application development and automation.
- Best Emerging Fresher (Accenture) for performance and adaptability.
- Rank 1 – Mathematics Olympiad (1500+ participants) for analytical ability.
- 3rd Position – Inter-school Debate (50+ schools) for communication skills.
